

Ius Iurandum Sangallensis

or

«How to address the social responsibility
of graduates of the University of
St.Gallen?»

Underlying concept ^{1/3}

Dual approach

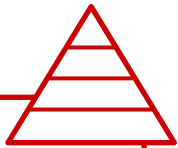

Compared to the classical approach of management oaths our concept allows for two directions of impact.

The student's individual
value system

Responsible
Acting and
Business

St. Galler
Verantwortungspyramide

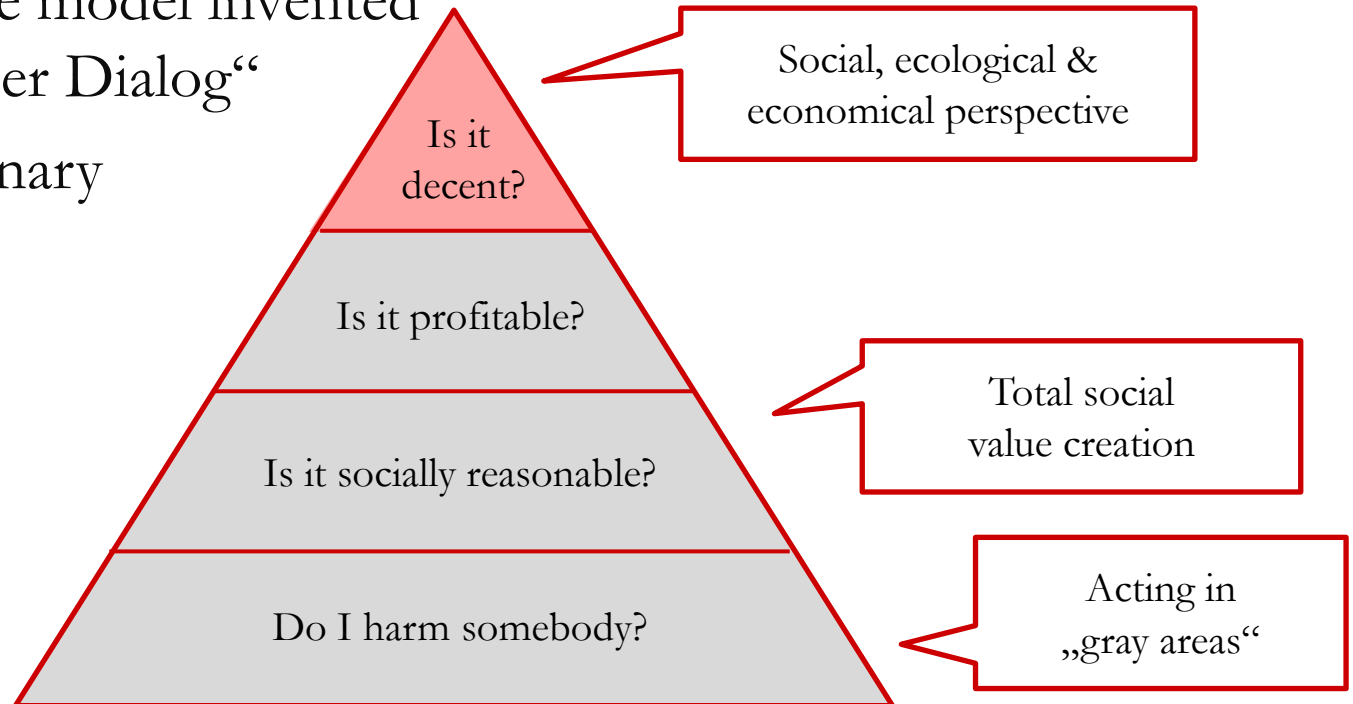

Underlying concept ^{2/3}

Top-down

- Conventional oaths: Impart value system top-down
- Asking questions instead of giving prearranged answers
- Based on the model invented by „Schweizer Dialog“
- Interdisciplinary

■ Individual
■ Society

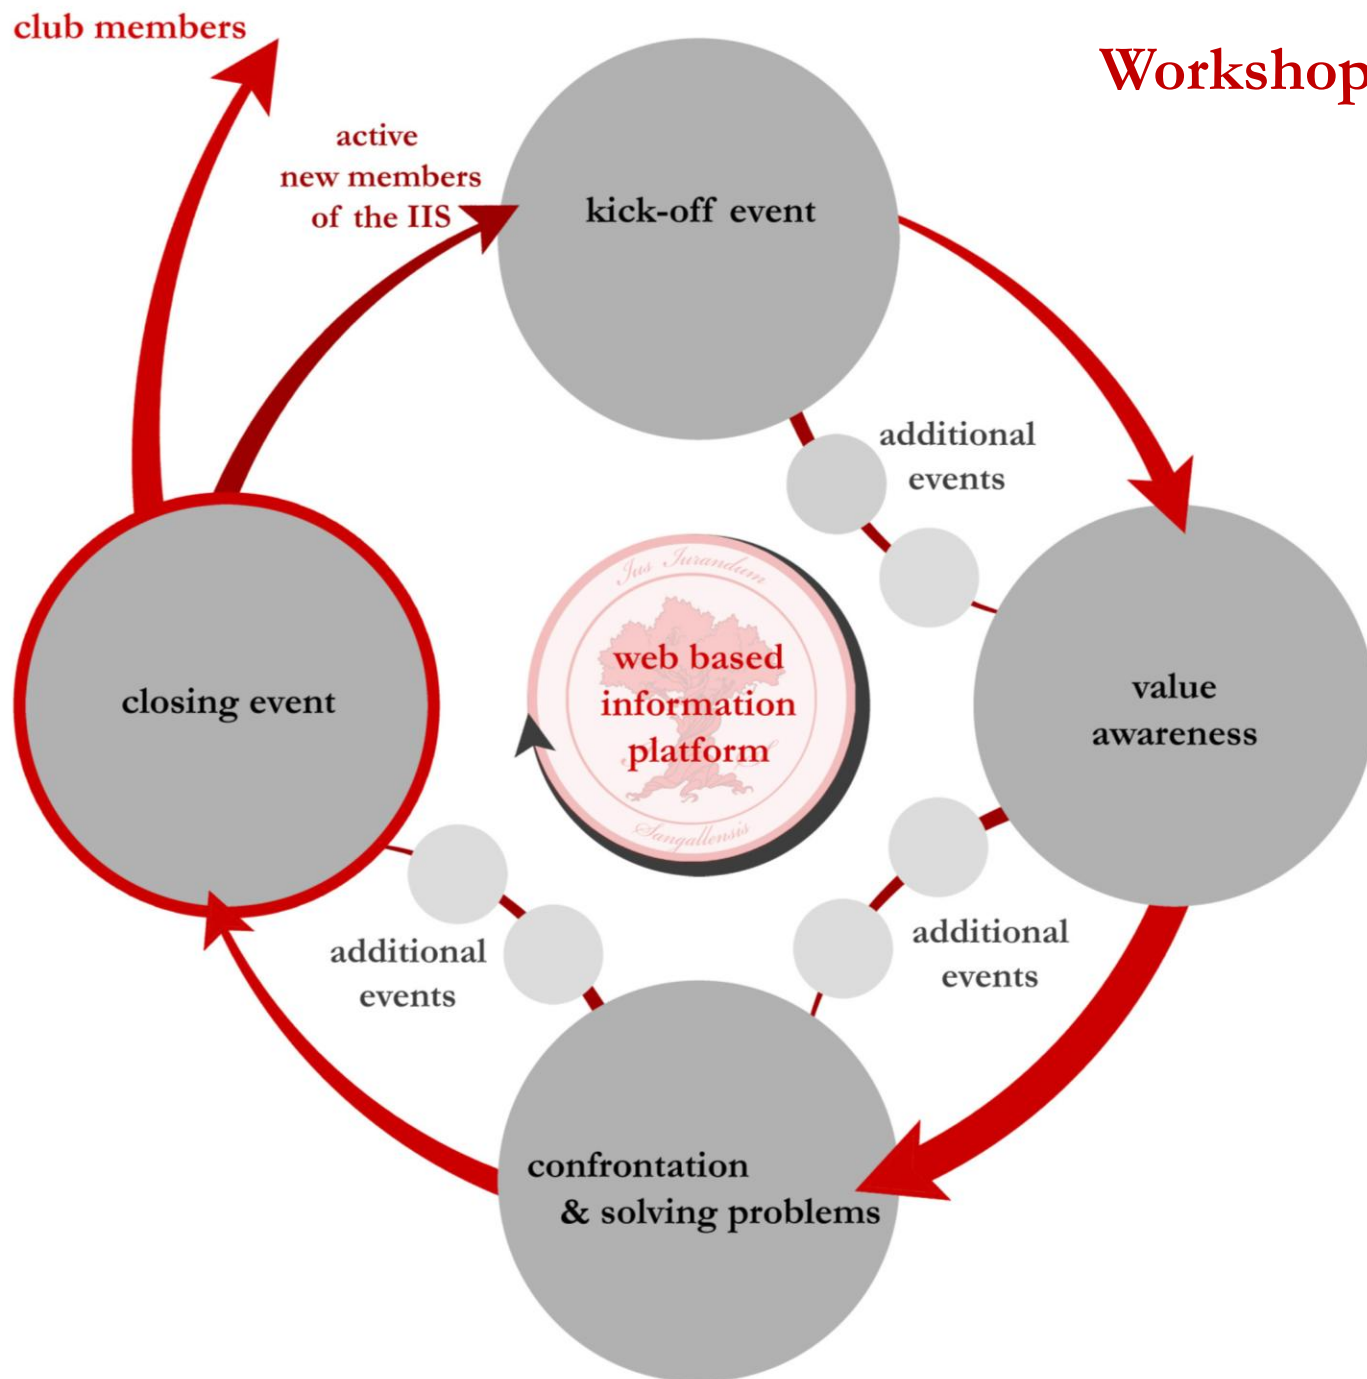

Underlying concept ^{3/3}

Bottom-up

- Antitype: EBSOS-system at which the students create a new Oath every year class for themselves
- Yet goal of the IIS: Every student shall be given the opportunity to put his/her most important values or the essence of what „decency“ means to him/her on record for to be able to look back on these believes at a later point in time.
- Second goal of the IIS is to show possible problematic situations as much related to practice as possible and to discuss options how to act in such situations.
- Instruments to reach those goals: Workshops and/or tutorials with alumni, which have already joined the IIS Club

Workshop concept

Next steps

- Embedding the members of the university's senate commission
- Planning of the event cycle, that shall be starting at beginning of autumn semester 2013.
- Further development of the concept of reflection processes (Workshops, tutorials, events, ...)
- **Win over guest speakers for our workshops**

Ius Iurandum Sangallensis...

... far more than just an oath!
